Important event to be reported:

Controlled shutdown of Unit 1 for some remediation works to the classic technological circuit of Unit 1

S.N. Nuclearelectrica SA (“SNN”) informs its shareholders and investors that Cernavoda NPP Unit 1 will be shutdown in a controlled manner during the night of Friday to Saturday (January 22 to January 23, 2021) in order to carry out remediation works as a result of a failure to the classical/secondary technological circuit of Unit 1. The power reduction maneuvers will start on January 23, 2021, 0:01 HRS.

We remind you that the controlled shutdown of Unit 1, initially announced for the night of January 15 to January 16, 2021, was postponed on January 15 to ensure the electricity production necessary to the National Energy System due to very low temperatures.

Both the postponement of the controlled shutdown and the controlled shutdown do not impact nuclear safety, personnel or population, the remediation works being done in compliance with the specific procedures.

SNN will communicate the date on which Unit 1 will be reconnected to the National Energy System.

Cosmin Ghita
