

SN Nuclearelectrica SA
COMMITMENT TO
OBSERVE ESG PRINCIPLES

NUCLEARELECTRICA

ESG Policy of SN Nuclearelectrica SA aims at implementing the ESG standards applicable to a nuclear energy producer, utilities category, and permanent improvement thereof to minimize the impact on environment, making corporate governance more efficient, social protection and reporting in a transparent and responsible manner for all categories of stakeholders. ESG policy of SN Nuclearelectrica SA is implemented by observing the related laws, implementation of standards, principles and ESG good practices at international level, established at organizational level through ESG Work Group and their approval by the executive and administrative management.

- ESG standards applicable to operators within the utilities category are assessed by reference to the activity filed and implemented by adopting adequate actions at the corporate level;
- Targets to reduce the environmental footprint are established: targets to reduce pollution, targets to reduce waste, targets to reduce water consumption, targets to reduce the use of resources, diversity targets, etc. in accordance with the ESG assessment standards and the specificity of Nuclearelectrica activity;
- The reduction actions shall be monitored and the progress is transparently reported in the annual ESG Report;
- Policies, procedures, regulations, guides shall be prepared and implemented on those three major ESG components: environmental, social and governance by the process owners, and such documents shall be examined within ESG Work Group and subsequently, that shall be submitted for approval of the executive and administrative management;
- A proactive attitude shall be promoted within the Work Group, and for the assessment of standards for the purpose of the annual preparation of a complete, complex ESG Report, which should document the progress;
- The members of ESG Work Group recommend improvement actions and promote them within the company to identify and implement the related actions;
- The members of the Work Group request, depending on necessities, the convocation of certain interdisciplinary ad-hoc groups for the examination and identification of measures to continuously improve ESG;
- SNN staff promptly answers to the requests on the part of members of ESG Work Group;
- ESG Work Group requests ESG ratings and the ESG external insurance for an objective, neutral assessment of the ESG process and the SNN level;
- ESG policy aims at positioning SN Nuclearelectrica SA as a responsible and transparent operator.
